

Are Ear Tagged or Radio Collared Deer Legal for Harvest?

Yes!

We only ask that you treat the marked animal like you would any other deer. If you would normally shoot the animal, shoot it. If you normally wouldn't shoot the animal, then don't shoot it.

Reporting Instructions

Ear tagged and radio collared deer are legal for harvest. Treating marked deer similar to any other deer will provide the most accurate measures of survival.

If you harvest or find a marked deer please call 608-221-6358 and report it. If there is no answer, please leave a message regarding the ear tag numbers or collar frequency, the type and date of mortality, and your contact information, including area code.
